

ABSTRACT

ROLE OF NONGOVERMENTAL FORESTRY EXTENSION WORKERS FOR ASSISTING PEOPLE TO OBTAIN COMMUNITY FOREST LICENSE IN SENDANG AGUNG SUBDISTRICT CENTRAL LAMPUNG REGENCY

By

FADILA AYU LARASATI

One of the solutions to increase the community welfare and manage the forest is giving the HKm license by regent/mayor. The implementation of community forest intend to give space for the local community for sustainable forest management. The submission of hkm license was done by the farmers to the regent/mayor facilities by PKSM. The objectives of this research were to analyze the role of PKSM level for assisting farmer to obtain HKm license and analyze the correlation between external factors and internal factors of partner with their role. This research was done in Subdistrict Sendang Agung as an area under the jurisdiction of PKSM to assist submission of HKm license. The data was analyzed by Chi Square test, meanwhile to detect the correlation level of respondent factors with partner role is using coeficient contengence correlation analize. Based on analize result partner role level is obtained in high classification, partner role is releas as dynamist, mediator, facilitator, motivator, and educators. Internal factors companion that has a strong enough relationship with the role of the companionis the number of dependents, long-serving, and cosmopolitaness, where as age, income, as well as information disclosure had uneasy relations. External factors companion that has a strong enough relationship with the companion role is recognition of the success and intensity of supervision, facilities have less close relationship level with the role of companion.

Keywords: coefficient contingency, HKm, role of PKSM.
