Law No. 6 of 2014 on Village brings a new paradigm in rural development planning. Currently authority rural development remains an issue, whereas rural development is under the authority of the Ministry of Rural accordance birth Act Village. The problem in this research is the authority of village autonomy in planning the field of rural development and what are the factors inhibiting the implementation of village autonomy authority in the field of construction of the village.

Approach to problem which used is the juridical approach normative and juridical empirical. Data which used is primary data and secondary. The data which already processed then presented in the form of blurb, ago dintreprestasikan or interpreted for done the discussion of and analyzed qualitatively, then for selanjutnya be drawn a conclusion.

Based on research results and of solution known that the authority of village autonomy in planning the field of village development has been done through the process of program planning of development who is participatory, transparent, accountable and detailed because of through a series of stages which covering: social preparation and design the study of, identification general condition the village, analysis asset, reflection,-depth study and plenary, Musrenbangdes, and post-Musrenbangdes. Government Market Village Baru not yet can organizes process development planning in accordance with Undang-Undang No 6 the year 2014 and article 63 of Regulation of Government Number 72 years 2005 which states that the obliging to the Government the village for draw up plan Term Development Medium-village (RPJMDes). Inhibiting factors the application of authority of village autonomy in the field of construction of Desa among others from factors fasilitas and human resources very hinder the performance of reign of village, factor of society and factors Undang-Undang enacted still weak. Village government given authority to conduct own what they need, but with ability which very marginal.

To the Government of Market Village Baru need to consummation the stages of the implementation of participatory planning order to be able be implemented

manner simpel and easily understood good by the device the village government and kecamatan nor the society with does not reduce the principle of-the principle of participative.
