

BAB VI

SIMPULAN DAN SARAN

A. SIMPULAN

Sektor pertanian merupakan lapangan kerja yang sejak lama menjadi tumpuan dari banyak individu di Lampung. Rendahnya pendapatan yang di peroleh para petani dari usaha pertanian mereka membuat mereka harus hidup di garis kemiskinan hal ini di karenakan rendahnya kualitas hasil panen perkebunan yang mereka usahakan hal ini di karenakan keterbatasan modal usaha yang di miliki oleh para petan untuk modal mereka mengarap lahan pertanian yang mereka miliki . Kurangnya informasi yang bisa menambah wawasan para petani untuk bisa menjadi petani yang baik dan rusaknya sarana yang medukung sektor pertanian mereka juga menjadi kendala bagi para petani agar lebih bisa menjadi lebih baik. Maka dari itu harus ada suatu usaha para petani untuk meningkatkan kualitas pertanian mereka dengan berusaha mencari jalan keluar yang terbaik buat mereka. Dari hasil penelitian yang dilakukan di lokasi penelitian yaitu Desa Karta Kecamatan Tulang Bawang Udik Kabupaten Tulang Bawang Barat, terlihat bahwa usaha-usaha petani miskin untuk meningkatkan pendapatanya pada dasarnya harus mencari dukungan

dari pihak lain dalam bentuk pinjaman modal usaha, pupuk dan pestisida-pestisida yang mereka butuhkan agar

ABSTRACT

BUSINESS-OPERATING REVENUE INCREASE IN POOR FARMERS

(Studies in Bone Village District Karta Udik Onions

Regency Bone Western Onion)

BY

BUDI Aryanto

Farming communities as part of Indonesian society was instrumental in the effort to meet national food needs in Indonesia, but the majority of farmers still in the next life the poverty line. This is because the limitations of venture capital, unggul seeds, fertilizers, pesticides and science that is they need to cultivate and maintain the kind of agriculture that they cultivated, in addition to damage to facilities and infrastructure that support their efforts also helped add to the difficulties they face.

In this study the issues examined are the efforts done by farmers to overcome the difficulties they hadapai such as venture capital, the limitations of science in turning the land and caring for the crops they grow, and what efforts they have done to keep facilities that really support their own agricultural businesses to the quality of their agricultural economy for the better so that they can improve.

In this study there were 5 people informant used as a source of information is needed. While the methods used in this study is a qualitative descriptive method object is a human or a symptom of something that affected humans, the object was examined in a condition as is reasonable in the

circumstances or the naturalistic (natural setting). In the process of qualitative descriptive study, data obtained shows the behavior of individuals and the state as a whole. Qualitative research study shows the procedures that produce qualitative data, phrases or record one's own behavior as well. The research was conducted by means of observation and interviews of the farmers who have long lived and settled in the Village District Karta Bones Bones Onion Onion Udik Western District as a research location. The analysis of technical data in this study is channeled through the data reduction, data display (presentation data) and data verification (draw conclusions).

Based on this research can be in the know that the efforts of poor farmers in improving the look of its income from their efforts to obtain capital by way of cooperating with the third party, as well as land preparation and crop care is good enough it can be seen from the procedure they do in pengoahan agricultural land and their own treatment plants. See also the farmers here are always trying to find information in order to increase their insight, it is seen from the farmers to follow the often-agricultural extension outreach activities undertaken by relevant agencies as well as the exchange of knowledge among farmers themselves. While their efforts in conducting treatment facilities and infrastructure that support their farms is realized by always actively participates in activities of mutual cooperation to improve roads, bridges, canals and even envy of the trunk as well as donations to pay the sums they had both agreed on.
