Village government, are required to have proficiency in financial management, in particular the ability to explore the sources of revenue to create independence hometown. This is important because the Revenue Village is one of the sources of funds used in the preparation of APBK for village governance. The problem of this study are the sources of revenue Tanggulangin village actually has great potential, mainly sourcing from village markets and multi-purpose building. But the reality Tanggulangin Revenue Villages in 2011 was not able to gain admission revenue exceeding Kampung previous year, in 2010 (no increase / same). This is presumably due to incompetence or incapacity Tanggulangin village government officials in managing the sources of revenue such sizeable village.

The purpose of this study was to determine the management of revenue sources to increase revenue APBK village in Kampung Tanggulangin Punggur District Lampung Tengah regency in 2011. The research method used is descriptive using qualitative data, which means that managing research data and facts to further research the analysis relating to the management of revenue sources Kampung Tanggulangin.

These results indicate that the receipt of income from the management of revenue sources Kampung had not increase from 2010 to 2011, due to the lack of ability of the government at Kampung Tanggulangin in managing the sources of revenue village.
