*Bandar Lampung is one area in Lampung Province who is prone to disasters. According BPBDs Bandar Lampung during the period 2013-2014 there has been a lot of disasters, the breakdown is as many as 124 cases of fallen trees, fire 81 cases, 19 cases of floods and landslides in 10 cases with a total loss of the building as much as 1,191 units. From January 19 to April 28. 2014, BPBDs recorded as many as 34 cases of fire. This study aims to describe the capabilities BPBDs Bandar Lampung and constraints faced by BPBDs in disaster management. This research is a descriptive study with qualitative approach.*

*Based on the research found: (1) Many of the agencies that should be involved but do not know if you are in a network BPBDs, (2) Human resources are not adequate training to existing personnel (3) The financial sector is fairly minimal resulting in disaster management is not running effective. (4) Logistics disaster management there is a shortage in the number of fire engines as well as logistics equipment can not be used anymore (5) Not effective training and provision of information carried BPBDs Bandar Lampung. Suggestions can give is (1) Clarifying the duties and functions of each department or agency involved (2) Coordination among agencies involved need to be built by BPBDs (3) Increase the quality of the knowledge of its human resources (4) Increases allocation of funds to carry out all the disaster management process circuit (5) Adding disaster management logistics for each type of disaster.*
