## I. PENDAHULUAN

A. Latar Belakang ................................................. 1
B. Tujuan Penelitian ............................................ 3
C. Manfaat .......................................................... 4
D. Kerangka Pemikiran .......................................... 4
E. Hipotesis ......................................................... 6

## II. TINJAUAN PUSTAKA

A. Aspek Biologi Ikan Cupang (*Betta* sp.) .................. 7
   1. Klasifikasi dan Morfologi Ikan Cupang (*Betta* sp.) .... 7
   2. Perilaku Ikan Cupang (*Betta* sp.) ......................... 9
   3. Reproduksi Ikan Cupang (*Betta* sp.) ....................... 10
   4. Habitat Ikan Cupang (*Betta* sp.) .......................... 11
   5. Pakan dan Kebiasaan Makan ................................ 11
B. Sex Reversal .................................................... 12
C. Hormon Testosteron ........................................... 13
D. Penampakan Warna Ikan ....................................... 14

## III. METODE PENELITIAN

A. Waktu dan Tempat ............................................... 17
B. Alat dan Bahan .................................................. 17
1. Alat Penelitian ................................................................. 17
2. Bahan Penelitian ............................................................. 17
C. Rancangan Penelitian ....................................................... 18
D. Pelaksanaan Penelitian ..................................................... 19
   1. Persiapan Wadah .......................................................... 19
   2. Pemijahan Induk Ikan Cupang ......................................... 19
E. Pemberian Perlakuan ....................................................... 20
F. Menajemen Pemberian Pakan ........................................... 22
G. Parameter Pengamatan .................................................... 22
   1. Derajat Penetasan (HR) .................................................. 22
   2. Kelangsungan Hidup (SR) ............................................... 22
   3. Nisbah Kelamin ............................................................ 23
   4. Intensitas Warna .......................................................... 23
   5. Pengukuran Kualitas Air ................................................ 24
H. Analisa Data ................................................................. 24

IV. HASIL DAN PEMBAHASAN
   A. Pengamatan Derajat Penetasan (HR) ............................. 25
   B. Pengamatan Kelangsungan Hidup (SR) ............................ 26
   C. Nisbah Kelamin ............................................................ 26
   D. Pengamatan Perbedaan Intensitas Warna .......................... 29
   E. Kualitas Air ................................................................. 32

V. KESIMPULAN DAN SARAN
   A. Kesimpulan ................................................................. 35
   B. Saran ............................................................................ 35
