Agency Consultative Village (BPD) were elements of the organisers of the village government together village head. BPD as a legislative body villages have a supervisory function to oversee the performance of the village head on doing development especially in the use of village funds allocation. The management of village funds allocation that is not accompanied by supervision BPD the ability to supervise real be a problem in Indonesia. Where supervision that BPD is still a question mark, given the lack the ability of BPD in carrying out functions and tasks.

The purpose of this research is to find how supervisory agency consultative village Waringin Jaya for the management of village funds allocation in 2013. Type research that is used is descriptive with a qualitative approach, it means the research was done by managing the data and the facts to be further researchers analysis which is related to supervision BPD in the management of village funds

allocation 2013. Data collection techniques that is in-depth interview and documentation study.

The research results show that BPD Waringin Jaya not maximum in running the supervisory function in the management of village funds allocation 2013. This was caused by lack of the role of active members of BPD in the running of the supervisory function as well as the absence of good coordination between members of BPD and village heads, from the preparation process for development programs , the development process , and the process of accountability the use of ADD.
