

ABSTRACT

The Role of Community Groups in Fostering Community Participation in the Program of Simultaneous Movement of Build Village in Gedong Aji Subdistrict of Tulang Bawang Regency

By

Pramulianto Pohan

This study is aimed at analyzing: (1) the role of community groups in the GSMK Program in Tulang Bawang Regency (2) society participation in the GSMK Program in Tulang Bawang Regency, (3) the relationship between the role of community groups and the society participation in the GSMK Program in Tulang Bawang Regency. The data was analyzed using a descriptive analysis method to analyze the role of community groups and the level of community participation, while the relationship between the role of community groups with community participation level was analyzed using non-parametric statistical analysis Spearman's rank correlation with SPSS (Statistical Package For Social Science). It is more appropriate because the Spearman rank correlation test can test or determine the relationship between independent variables and the dependent variable . The results showed that (1) The role of community groups in the program GSMK in Tulang Bawang in the medium category with a score of 34.66. (2) The level of community participation in the Program GSMK in Tulang Bawang in the high category with a score of 22.48. (3) There was a real relationship between the role of community groups with the level of community participation in the GSMK Program.

Key words: GSMK program, society participation, the role of community groups.
