ABSTRACT

Patternsof SocialInteractionBetweenEmployersWithBaby Sitter InChild Care
(Studi in Kota Baru Indah Estate, Tanjung Karang Timur, Bandar Lampung)

By
Adanthi Liza Despraditha

The purpose of this is to determine the patterns of social interaction between research aimtoexplainanddescribehowpatterns ofinteractionbetween theemployers with baby sitter in child care in Kota Baru Indah Estate. This research used symbolic interactionism theory came from George Herbert Mead. The method used in this research through a qualitative approach with 10 informants.

The results showed that there was in pattern of interaction between the employer with a baby sitter contained some symbols that interpret or explain how to express the difference in status in child care. It can be seen that in interaction between two people is going to continue to produce an action that has meaning and it is a symbol. Thereby, symbolic interactionism theory used in this theory is related to the interaction between two individuals that have every action that occurs and has its own symbols.
