# I. PENDAHULUAN

A. Latar Belakang ............................................1
B. Tujuan Penelitian .........................................4
C. Manfaat Penelitian ........................................4
D. Rumusan Masalah ..........................................5
E. Batasan Penelitian ........................................5
II. TINJAUAN PUSTAKA

A. Penelitian Terkait .................................................................6
B. Gelombang Suara .................................................................10
C. Suara ...................................................................................18
D. Sensor dan Transduser .........................................................20
E. Transduser Mikrofon .............................................................21
F. Ethernet ...............................................................................24
G. Protokol TCP/IP .................................................................26
H. WIZ110SR .......................................................................26
I. Mikrokontroler ATmega16 .....................................................28
J. Sound Level Meter Leutron SL-4011 ...................................32
K. Surfer Golden Software .......................................................35

III. METODE PENELITIAN

A. Tempat dan Waktu Penelitian .............................................39
B. Alat dan Bahan .................................................................39
C. Prosedur Penelitian ............................................................40

IV. HASIL DAN PEMBAHASAN

A. Hasil Penelitian .................................................................52
B. Perangkat Lunak ...............................................................90
C. Data Pengamatan ...............................................................96
D. Analisis Sistem Akustik ......................................................101
E. Rekomendasi .................................................................104

V. KESIMPULAN DAN SARAN

A. Kesimpulan .......................................................................108
B. Saran ...............................................................................109
