Community empowerment is one of the programs announced by the government in order to make the people who are skilled and economically independent . In this community empowerment indispensable role of extension workers . National Park Management Section Region II Bengkumat ( SPTN II Bengkumat ) is one of the government agencies in charge of preserving the national park one way to educate more people around TNBBS . However TNBBS extension has not shown the maximum results , this is because the number of extension workers are very minimal , facilities and infrastructure are inadequate and difficult to provide understanding to the public about the importance of conserving the forest .

The research objective is to identify and explain the performance conducted by Extension Section of the National Park Management Agency Region II Bengkumat ( SPTN II Bengkumat ) in community development in Bukit Barisan Selatan National Park . This research method is qualitative research methods . Type is the type of qualitative research descriptive study that aimed to obtain and understand

and explain how the performance extension Agency Management Section of the National Park Region II Bengkunt ( SPTN II Bengkunt ) in community empowerment in TNBBS .

These results indicate that the performance of forestry extension SPTN II Bengkunt ineffective and inefficient is evident from improved public welfare . Based on 10 indicators that have been established 6 indicators are not met while 4 indicators are met but has not run with the maximum . Such as the alleged investigators to the difficult to providing an understanding of the importance of forest benefits and inadequate infrastructure became several factors who make the poor performance of the instructor.

Keywords: Performance, Community Empowerment .
