

ABSTRACT

PARENT COMMUNICATION PATTERNS IN GUIDANCE AKHLAQ ON CHILD PRE SCHOOL

(Studies on The Parent of District Beringin Raya Sub West Tanjung Karang)

**By
AMRIZAL**

Many factors cause delinquency in children, which can drag them to the moral deterioration and bad behavior. This was seen in the community, and the bitter reality of life filled with "madness-madness", how many sources of evil and destruction that dragged them from different angles and a foothold.

Progress and development of education in line with science and technology, so changes in the child's character is strongly influenced by the informal and formal education and non-formal. Application of the child's akhlaq education should be done as early as possible, so that the quality of certain noble son as a special provision for him. Generally for families, communities, nations and religions. Business Coaching is a new planting of seeds or a transformation and developing one's talents and abilities through the communication process is the delivery of material for younger children by using the method in order to achieve the desired objectives.

Current communication patterns of parents in children is very important, where the pattern of communication open and can talk with children from the heart more cultivated. In this study the author chose of District Beringin Raya Sub West

Tanjung Karang as a place of research on parental communication patterns preschoolers. This research is intended to answer the formulation of the problem of how communication patterns of parents in the development of morality in children pre-school age the family environment of District Beringin Raya Sub West Tanjung Karang?

And the purpose of this study to determine parents' communication patterns in developing morality in children pre-school age, in the family environment of District Beringin Raya Sub West Tanjung Karang.

This type of research used in this research is qualitative research. This research effort is limited to expressing a problem or situation as it is so is simply to express the fact (fact finding) the results of research focused on objectively describing the actual state of the object under study. Research object which I use as an informant in this study nine Muslim families who have preschool age children.

In accordance with the results of the discussion the writer makes the following conclusions:

1. Parents Communication patterns in preschool children.

Communication patterns that occur in the data found in the study authors in the field all these families have used the communication patterns star patterns.

Which is all the family members communicate with other family members.

And conduct open communication patterns on children.

1.a. Excess star pattern.

a. Self Attituded

Attituded star pattern raises the child in the family showed the ability to express himself openly to the other family members.

b. Familiarity

Create star patterns of intimacy in the family where the parents have the attitude dikeluarga informants togetherness, interrelatedness dependence, commitment, attention to their children.

1.b. Weakness star pattern.

Star pattern raises parent parenting that is spoiling the child, parents who always obeyed the will of children, and children can not act independently. This means that emotional and mental child can not develop in the informant's family.

2. The formation of moral development in preschoolers.

Children really need to habituation-conditioning and exercises in accordance with the development of his soul, because with the habituation-conditioning and exercises will form a certain attitude in children.

2.a. Example models

An exemplary attitude and good deeds and positive implemented by parents is required to be emulated by their children.

Let the parents can get used communication patterns with the pattern of stars and an open attitude, and provide moral guidance in the early diusia children by

example to children. And always pay attention to their children and foster the passion to ask questions and dialogue in preschool children.
