ABSTRACT

THE CORELATION BETWEEN MACRO ROLE PLAY ACTIVITIES AND THE 5 TO 6 YEAR OLD KID'S SPEAKING SKILLS

Oleh

DIYAH YUSNITA

The problem in this research was children speaking skills aged 5-6 years old that has not optimally developed at TK Al-Azhar 1 Bandar Lampung academic year 2014/2015. The research objective was to determine the corelation between macro role play activities with children speaking skills aged 5-6 years old. This research was non experimental quantitative research, with the corelation data analysis. Data were collected by observation and documentation. The data were analyzed by using cross table technique and Spearman Rank Corelation. The result showed that was strong corelation between macro role play activities with children speaking skills by 0,86 %. Therefor, it is recommended to involve more macro role play activities to develop children speaking skills aged 5-6 years old.
