DAFTAR TABEL ........................................................................................................... xviii

DAFTAR GAMBAR ........................................................................................................ xx

I. PENDAHULUAN ........................................................................................................... 1

A. Latar Belakang Masalah .............................................................................................. 1
B. Tujuan Penelitian ......................................................................................................... 2
C. Manfaat Penelitian ....................................................................................................... 2
D. Batasan Masalah ........................................................................................................... 2
E. Perumusan Masalah ...................................................................................................... 3
F. Hipotesis ....................................................................................................................... 3
G. Kajian Penelitian Terdahulu ....................................................................................... 3
H. Sistematika Penulisan ................................................................................................... 4

II. TINJAUAN PUSTAKA ................................................................................................ 5

A. Kecerdasan Buatan ...................................................................................................... 5
B. Pengenalan Sistem Pakar ............................................................................................ 5
   B.1. Ciri dan Karakteristik ............................................................................................ 7
   B.2. Kategori Sistem Pakar .......................................................................................... 9
   B.3. Metode Sistem Pakar ........................................................................................... 11
      B.3.a. Forward Chaining ........................................................................................... 11
      B.3.b. Backward Chaining ........................................................................................ 11
C. Metode Waterfall ......................................................................................................... 12

xv
C.1. Analisis Kebutuhan ....................................................... 13
C.2. Perancangan .............................................................. 13
C.3. Pengkodean ............................................................... 14
C.4. Pengujuan ................................................................. 14
    C.4.a. Blackbox testing ................................................ 14
    C.4.b. Whitebox testing ............................................... 14
C.5. Implementasi dan Pemeliharaan .................................... 14

D. Penyakit Tanaman Cabai ................................................. 15

E. Visual Basic 6.0 ............................................................ 25
    E.1. Form ........................................................................ 26
    E.2. Toolbox ................................................................. 27
    E.3. Jendela Properties .................................................. 28
    E.4. Dasar Pemrograman ............................................... 29

III. METODE PENELITIAN .................................................... 33

A. Perangkat yang Digunakan .............................................. 33
    A.1. Perangkat Keras .................................................... 33
    A.2. Perangkat Lunak .................................................... 33

B. Waktu dan Tempat .......................................................... 34
    B.1. Waktu .................................................................... 34
    B.2. Tempat ................................................................. 34

C. Perancangan Sistem ......................................................... 35
    C.1. Deskripsi Sistem ..................................................... 35
    C.2. Representasi Pengetahuan ...................................... 35
    C.3. Sistematika Penamaan Variabel ............................... 38
    C.4. Mesin Inferensi ...................................................... 49
C.4.a. Penerapan Graf Penelusuran Jenis Penyakit .......... 39
C.5. Perancangan Diagram Alir Data ........................................ 42
C.6. Perancangan Database ................................................... 45
C.7. Perancangan Antarmuka ............................................... 52

IV. HASIL DAN PEMBAHASAN ........................................... 66
A. Hasil ............................................................................ 66
   A.1. Implementasi ......................................................... 66
      A.1.a. Implementasi Pilihan Pengguna ......................... 67
      A.1.b. Implementasi Pilihan Pakar .............................. 68
B. Pembahasan .................................................................. 84
   B.1. Pengujian Sistem ..................................................... 84
      B.1.a. Basis Pengetahuan ........................................... 85
      B.1.b. Basis Aturan .................................................... 87
      B.1.c. Konsultasi ......................................................... 90
   B.2. Pembahasan Kasus .................................................. 92
   B.3. Pengujian Program ................................................ 99
      B.3.a. Alpha test ....................................................... 99
      B.3.b. Beta test ......................................................... 101

V. SIMPULAN DAN SARAN ............................................. 104
A. Kesimpulan .................................................................. 104
B. Saran ....................................................................... 105
