### I. PENDAHULUAN

<table>
<thead>
<tr>
<th>Halaman</th>
<th>Judul</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>A. Latar Belakang</td>
</tr>
<tr>
<td>3</td>
<td>B. Perumusan Masalah</td>
</tr>
</tbody>
</table>
C. Tujuan Penelitian ................................................................. 3
D. Batasan Masalah ................................................................. 4
E. Sistematika penulisan .......................................................... 4

II. TINJAUAN PUSTAKA

A. Heat Treatment ................................................................. 6
B. Holding Time ................................................................. 13
C. Quenching ................................................................. 15
D. Baja Karbon ................................................................. 18
E. Pengelompokan Baja .......................................................... 19
F. Baja AISI 1045 ................................................................. 20
G. Kekuatan Tarik ................................................................. 21
H. Uji Impak ................................................................. 23
I. Patahan Impak ................................................................. 28

III. METODOLOGI PENELITIAN

A. Tempat dan waktu ................................................................. 29
B. Alat dan Bahan ................................................................. 29
C. Prosedur Pengujian ............................................................. 32
D. Data Hasil Yang Diperoleh Dari Pengujian ......................... 33
E. Diagram Alir Penelitian .......................................................... 34

IV. HASIL DAN PEMBAHASAN

A. Pembuatan Spesimen Uji .......................................................... 35
B. Pengujian Kekerasan ............................................................. 36
C. Proses Heat Treatment .......................................................... 37
D. Pengujian Tarik ................................................................. 38
D.1. Raw Material ................................................................................................. 39
D.2. Material Holding Time 15 menit............................................................... 39
D.3. Material Holding Time 30 menit............................................................... 41
D.4. Material Holding Time 60 menit............................................................... 42
E. Pengujian Impak ............................................................................................ 45
F. Pembahasan .................................................................................................... 47

V. SIMPULAN DAN SARAN

A. Simpulan ......................................................................................................... 51
B. Saran ................................................................................................................ 52
