ABSTRACT

ANATOMY OF SOCIAL CONFLICT AND MECHANISM COMPLETION
(Studies Conflict SARA in the village of Palas Pasemah, Palas sub-district, South Lampung regency)

By

MIJWAD SEPTRIANSYAH

This study aims to describe the anatomy of the conflict through the elements of which the causes of conflict, the parties involved, the process of the conflict, the impact of social conflict and mechanisms for the settlement of social conflict that is used in the conflicts that occurred in the village of Palas Pasemah District of Palas. Stadi case made on conflicts between groups of villagers Palas Pasemah Semendo with a group of tribal villagers from tribal Bali Agung Bali.

This study used qualitative methods. Data collection using in-depth interview technique. Informen determination is purposive sampling by selecting some members of the public who are directly involved in the conflict in Palas Pasemah and some community leaders. Information analyzed to draw conclusions in accordance with the reality on the ground by the method of data reduction, data presentation, conclusion and verification.

The results showed that. First, the lack of good communication pattern between the two communities in addressing any problems that arise quickly lead to widespread conflict and can not be controlled. Second, the conflict initiated by the struggle between youth and then expanded into a conflict between villages. Third, the village youth Palas Pasemah less willing to blend in with the village youth Bali Agung because of cultural differences and beliefs / religion.

Keywords: Anatomy, Conflict.
