

## Appendix 13

OBSERVATION SHEET OF STUDENTS' ACTIVITIES  
(1<sup>st</sup> Cycle)

Topic : Analytical Exposition (Is Smoking Good for Us?)  
 Class : 2 Social 2  
 Day/Date : Wednesday-Thursday, May 15<sup>th</sup> – 16<sup>th</sup> 2013

No	Students' Activities	What Happen?	Why?
1.	Pre-Activities 1. Interested in the opening of the class	There are still some students who are talking with their friends.	The students are not ready yet to learn after having another subject before.
	2. Responding to the topic enthusiastically	The students are showing their enthusiasm.	The topic is seemed familiar to the students' daily life.
2.	While-Activities 1. Paying attention to the teacher's explanation	Most students pay attention to the teacher.	They seem interesting with the explanation.
	<b>Exploring</b> 2. Responding to the teacher's questions about the topic enthusiastically	Some students can respond well but the others still looked confused to express their ideas.	Those who cannot answer the question are not paying attention to the teacher's explanation.
	3. Actively involved in the exploring steps	Only those who sit in front actively involved.	The others seem try to understand the material given.
	<b>Clustering</b> 4. Following the teacher's instruction (work in group)	The students form their own group which seem a little bit unfair.	The boys who were only 8 students do not want to join with girls in group.
	5. Actively involved in the group discussion	There are still 2 or 3 students who just chat with their friends and do not discuss.	This group consists of weak students.
	<b>Simulating</b> 6. Actively presenting the result of group discussion in front of the class	done	The students are free to express their ideas and to give questions to their friends.
	<b>Valuing</b> 7. Actively involved in the valuing - steps	It is dominated by the students who are good in speaking.	The others are still afraid of making mistakes in speaking.
	<b>Evaluating</b> 8. Able to evaluate what they have been done in the learning process	The students from one group give comment to another group and try to evaluate the learning process.	They can know what should be improved.
3.	Post-Activity 1. Able to summarize the material by responding to the teacher's question	done	The students seem understand with the material given.
