DAFTAR ISI ................................................................. iv
DAFTAR TABEL .................................................................. vi
DAFTAR GAMBAR ................................................................ ix

I. PENDAHULUAN .................................................................. 1
  1.1 Latar Belakang dan Masalah .................................................. 1
  1.2 Tujuan Penelitian .............................................................. 3
  1.3 Kerangka Pemikiran .......................................................... 4
  1.4 Hipotesis ....................................................................... 5

II. TINJAUAN PUSTAKA .......................................................... 6
  2.1 Kacang Panjang ............................................................... 6
    2.1.1 Klasifikasi dan Morfologi Tanaman Kacang Panjang .......... 6
    2.1.2 Teknik Budidaya Tanaman Kacang Panjang ...................... 7
    2.1.3 Kandungan dan Kegunaan Kacang Panjang .................... 9
  2.2 Pemuliaan Kacang Panjang ................................................ 10
  2.3 Antosianin ................................................................... 11
  2.4 Analisis Brix .................................................................. 11
  2.5 Uji LSI (Least Significance Increase) .................................... 12
  2.6 Uji Organoleptik ............................................................. 13

III. BAHAN DAN METODE ....................................................... 14
  3.1 Tempat dan Waktu Penelitian ............................................. 14
  3.2 Bahan dan Alat ............................................................... 14
  3.3 Metode Penelitian ........................................................... 15
  3.4 Pelaksanaan Penelitian ..................................................... 17
    3.4.1 Pengolahan tanah dan pembuatan petak percobaan .......... 17
    3.4.2 Penanaman dan pemberian pupuk dasar ......................... 18
    3.4.3 Penyulaman .............................................................. 18
