

ABSTRACT

THE IMPLEMENTATION OF PROVIDING URBAN GREEN SPACE IN BANDAR LAMPUNG CITY

By

WINDA SEPTIANA

Urban green space is one of the most important part of the city. Nowadays, according to City Planning Department of Bandar Lampung city, the existance of urban green space in Bandar Lampung is about 11,08%. Nevertheless, it is not appropriate with law number 26 of 2007 about Spatial Planning which has mandate about urban green space have to reach at least minimal 30%. The purpose of this research is to know the implementation in providing urban green space in Bandar Lampung city. This research uses descriptive analysis and qualitative approachment. The technique of data collection used were interviews, observation and documentation.

This research uses four indicators based Edwards III implementating public policy indicators, it is structure of bereaucracy, resources, dispositions and communication. The result of first indicators which is structure of bereaucracy, direct contact and being major actor in a successful implementation of law regulation. Next as seen from supply resources, tendency and communications has proving that the implementation of Local Regulation of Bandar Lampung Number 11 of 2011 about Regional Spatial Planning of Bandar Lampung City were running good but not yet optimal. The implementation of Local Regulation of Bandar Lampung Number 11 of 2011 about Regional Spatial Planning of Bandar Lampung City, publics play an active roles in caring the urban green space area in their surrounding. Furthermore in direct implementation, publics continue to conserve and treat the green areas in their neighbourhood. They also use urban green space area as a recreation facilities, playground and sports facilities. Another benefits from urban green space besides ecological advantage will increase public awareness to save the existment of urban green space areas in Bandar Lampung.
