

ABSTRACT

THE INFLUENCE OF PROJECT BASED LEARNING MODELS TO WARD THE RESULTS OF STUDENT LEARNING ON GEOGRAPHY SUBJECTS IN SMA AL-AZHAR 3 BANDAR LAMPUNG IN ACADEMIC YEAR 2014 / 2015

By

Wina Triani

The purpose of this research to know (1) the difference of the student learning results in experiment and control class (2) the influence of the project based learning model to study results. The research of quasi experiment method and use posttest-only control research design. Population in this research is the entire class XI IPS with sample class from class XI IPS 3 and XI IPS 4 determined by purposive sampling technique. Data collected by test technique and documentation. The hypothesis use t-test and One Way ANOVA test. The research results indicated there is (1) significant difference on the outcome of student learning where students study results who were given model project based learning treatment were higher than students who were given conventional treatment, (2) there is influence of project based learning model to the results of student learning.

Keywords: *Project based learning, learning outcomes geography.*
