

### Lampiran 13

Homogeneity of Variance					
Response	Skor				
Factors	Variabel				
ConfLvl	95,0000				
Bonferroni confidence intervals for standard deviations					
Lower	Sigma	Upper	N	Factor Levels	
8,3663	9,8863	12,0320	89	Persepsi Siswa	
10,2360	12,0958	14,7210	89	Prestasi Belajar	
9,5769	11,3170	13,7731	89	Sikap Siswa	
Bartlett's Test (normal distribution)					
Test Statistic: 3,607					
P-Value : 0,165					

$$\chi^2_{\text{hitung}} = 3,607$$

$$\chi^2_{\text{tabel}} = 5,991$$

Karena  $\chi^2_{\text{hitung}} < \chi^2_{\text{tabel}}$  maka varians ketiga variabel adalah homogen

### Lampiran 13

#### Homogeneity of Variance
