This study aimed to analyze the causality relationship between Gross Domestic Product ( GDP ) , export, and Foreign Direct Investment ( FDI ) in Indonesia. This study uses time series data taken from Bank Indonesia ( BI ) and the Badan Pusat Statistik ( BPS ) in the period 2004: Q1-2014 : Q4 . The analytical used Granger Causality method using E-views program assistance. Results of this study indicate there are two way relationship between GDP with export and GDP with FDI . Meanwhile there is one way relationship between variable export with FDI.

Keywords : GDP , FDI , exports and Granger Causality
