ABSTRACT

FACTORS THAT AFFECTING TO THE INEQUALITY OF ECONOMICS DEVELOPMENT IN DKI JAKARTA PROVINCE PERIOD 2009-2013

By

RANGGA SATRIA RAHARDIANSYAH

Inequality of economic often used as an indicator of differences in income per capita on average, inter-group income levels, employment among groups, and between regions. This study aims to provide empirical evidence about the influence of labor, unemployment and poor people to the inequality of economic development. This study uses panel data consisting of 5 districts in the province of DKI Jakarta. Analysis with Random Effect and uses eviews 6.0 software. Calculation shows that the variable labor, unemployment and poor people affect the inequality of economic development in DKI Jakarta Province either partially or jointly. But in partial influence of labor have a negative effect on the level of inequality of economic development in DKI Jakarta province during the study year 2009-2013.
