**Philia Hefisa**

Since the policy of regional autonomy in Indonesia was announced, many areas that tend to carry out regional divisions as a result of the delegation of authority from central to local. Pesawaran is one of the implications of granting authority in the area. As a new district, Pesawaran needs to be revisited its ability to manage the area further, to have decided to be developed or restored its mother district.

Area's revenue is one of essential aspect in the process of implementation and sustainability in local government. To increase revenue optimally and ideally, The Local Government of Pesawaran District race to raise local revenues in the sector. Performance of PAD is analyzed by measuring effectiveness, contributions and growth.

Based on the analysis we can conclude that the performance of PAD revenue has not been ideal, but Pesawaran has its own ability to develop local potential so that PAD has a chance to have a big role in area's revenue. Hence, they need to do some efforts to increase PAD based on its potentials. Pesawaran tourism sector till now still potential to be developed as a source of revenue, so that we need to make a further review on the development of a sector. Beside that, they need to maximize the leading sector through the empowerment of local enterprise in mining sector.
