Analysis of the Partnership Pattern of Local Government and Private Sector in the Perspective of Good Corporate Governance (Study in Partnership of Lampung Provincial Government with PT Gunung Madu Plantations).

By :

Yahnu Wiguno Sanyoto

The purpose of this study is to analyze the partnership pattern of local government and private sector in the perspective of Good Corporate Governance, through studies in the partnership pattern of Lampung Provincial Government with PT Gunung Madu Plantations, thereby building partnerships with the private sector as domestic and foreign investors once created a synergistic relationship (the interrelation and interaction), both horizontally, vertically or diagonally between the government-private-community as the elements of good governance.

The research method that used in this thesis is qualitative research method with qualitative descriptive approach. The technique for determining the informants by using purposive sampling based on the consideration of certain criteria. data collection combines the techniques of interview, documentation, observation, and using data analysis with reduction step, data display and data verification.

The result of the discussion can be concluded that the Government of Lampung Province has partnered with the private sector who invest in the Province of Lampung. The partnership patterns that developed up till now between the Government of Lampung Province with the private sector can be seen from the policy aspects that form the pattern of **monopolistic partnerships**, institutional aspects that form the pattern of **competitive partnerships**, infrastructure aspects that form the pattern of **collaborative partnerships**, human resource aspects of forming a

partnership accommodative – participatory, and aspects of natural resources and environment that form the **sustainability-welfare partnership**.

Based on the 5 (five) developing partnership pattern, can be classified into 3 (three) alternative patterns of (a) **the pattern of policies** relating to policy and institutional aspects; (b) **pattern involving** the preservation of the infrastructure and resources nature and the environment; (c) **the pattern of welfare-related** aspects of human resources.
