Rahmad Winarto

In increasing the effectiveness of poverty reduction and employment creation, the government launched the National Program for Community Empowerment (PNPM) starting in 2007. Through the PNPM Mandiri redefined poverty reduction mechanism involving the community, ranging from the preparation, participatory planning, implementation activities, monitoring, evaluation, reporting, and socialization. So that the handle can be sustainable and systemic and comprehensive in poverty reduction. National Program for Community Empowerment (PNPM) is a continuation of the Rural District Development Program (KDP), which is in accordance with government regulation PP No.27 of 2005 on fields that can be cooperated is to increase rural economy, improving health services, education, exploit natural resources and environmental sustainability and socio-cultural.

While the objectives of the National Community Empowerment Program (PNPM) income Rural an effort to improve society. National Program for Community Empowerment (PNPM) Rural is the continuation of activities to support the Presidential Directive Presidential Directive No. 5 / 1993 on Disadvantaged Villages (IDT) which is designed for even distribution of local development and fight poverty.

Implementation of the National Community Empowerment Program (PNPM) Wonosari Village Countryside in Pekalongan District, of building roads Telford and Savings and Loans Women's Aid (SPP), which is devoted to women who already have a group of organizations that stand for more than one year. While PNPM aid refund in the manner in installments with the burden of 1.5% per month for 10 months. While funding for infrastructure development by the community does not need in return.

Problems in this paper is How the influence of Savings and Loans Women's Group (SPP) National Community Empowerment Program (PNPM) to Rural communities assistance fund savings and loan recipients are women in the village of Wonosari kecamatan Pekalongan Timur Lampung district. In this study, the number of respondents is 45 persons. This research pertained to the descriptive study, by describing a situation, or subject and object of research, describes the data based on existing facts based on respondents' answers.

Based on the results of the discussion. Savings and loan assistance fund women's groups Wanosari PNPM At Village East Lampung regency of Pekalongan District granted to 45 people who are mostly engaged in trade and agriculture sectors. Proven savings and loan grants PNPM-MP women's groups to increase public revenues, this can be seen from table 4.12, there is that the people who capable development business with the "Good" after receiving capital grants from the PNPM-MP as many as 39 people or a total of 86.67 %. Capital grants in addition to the PNPM-MP as a stimulus to enlarge the business scale of society, can also be a trigger for the community to establish an own business. This can be seen from table 4.1.
