IV. HASIL DAN PEMBAHASAN

A. Data Hasil Pengujian terhadap Sampel Tanah Asli ......................... 43
B. Klasifikasi Tanah Asli ...................................................................... 46
C. Hasil Pengujian Pemadatan Tanah Campuran.................................. 48
D. Hasil Pengujian Paving Block Sesuai Kadar Campuran.................. 50
   1. Uji Kuat tekan .............................................................................. 50
   2. Uji Daya Serap Air ...................................................................... 58
   3. Uji Berat Jenis ............................................................................. 61
   4. Uji Batas-batas Konsistensi (Atterberg) ..................................... 62
E. Perbandingan Nilai Kuat Tekan Campuran Lainnya....................... 66

V. PENUTUP

A. Kesimpulan ...................................................................................... 69
B. Saran ................................................................................................ 70
