

ABSTRACT

THE CORRELATION OF THE TEACHER'S TOWARD THE HEADMASTER'S LEADERSHIP, WORK MOTIVATION AND PEDAGOGIC COMPETENCE WITH TEACHER'S PERFORMANCE IN SMAN ABUNG NORTH LAMPUNG

**By
Tuti Rospasari**

This research was aimed at finding out the significant level of correlations: 1) correlations among teacher's toward the headmaster's leadership, work motivation and pedagogic competence with teacher's performance; 2) correlation between teacher's toward the headmaster's leadership with teacher's performance; 3) correlation between work motivation with teacher's performance; 4) correlations between pedagogic competence with teacher's performance of SMAN teacher in Abung North Lampung.

This research was basically a correlations research. The population was all SMAN teacher in Abung North Lampung. The number of sample was 64 teachers chosen by using proportional random sampling technique. Whereas, the instruments used are test for teacher's toward the headmaster's leadership, and questionnaire to teacher's performance, work motivation, and pedagogic competence. Analysis technique of the data multiple and simple correlation.

The result of this research was shown that : 1) there were tight, significant, and positive correlations among teacher's toward the headmaster's leadership, work motivation and pedagogic competence with teacher's performance, towards correlation coefficient $r_{x_{123}y} = 0,755$, 2) there was tight enough, significant, and positive correlation between teacher's toward the headmaster's leadership and teacher's performance, towards correlation coefficient $r_{x_{1}y} = 0,533$, 3) there was tight, significant, and positive correlation between work motivation and teacher's performance, towards correlation coefficient $r_{x_{2}y} = 0,635$, and 4) there was tight, significant, and positive correlation between pedagogic competence and teacher's performance, towards correlation coefficient $r_{x_{3}y} = 0,600$.
