In Indonesia today has undergone many advances in the field of information, although not yet separated from the economic crisis. Recognized the proliferation of television stations must bring progress and development for the community think of nature, and especially the people of Indonesia. Development of science and technology, especially television today in addition to rapidly bring great benefits for human life also cause negative consequences. Among them is the growing crime and violence is always accompanied the development of society.

To determine hardness on a housemaid made by the mother-housewife, now the mass media (television) has broadcast the news that the charged acts of violence on a domestic servant. As for other forms of violence that we see or know of a housemaid who typically occurs, among others, such as physical violence, psychological and sexual violence, including rape, sexual harassment, and intimidation in the workplace, and in other public spaces , trading across borders and forcing women into sex work and sex-related jobs (*model porn film*) and others.

The formulation of the problem in this research is "How can understanding domestic violence on the news on television in shaping the anti-violence stance, studies on domestic servants in the Sea Hostel Brimob Swamp?".

The aim of this research is to know understanding of domestic violence on the news on television in shaping the attitude of anti-violence perpetrated domestic servants in Slough Brimob Sea Hostel.

Type of research is descriptive type. The approach used was qualitative research. The informant in qualitative research continues to be aimed at developing (*purposive*) to the data collected is considered satisfactory. This research was conducted at the Mobile Brigade Swamp Boarding Sea.

Results showed that all informants can understand the violence that occurs as aired on television. Since television as a conduit of information communication devices, the messages spread throughout the high-speed corners of the world. The informant also explained that violence by beating them, and in iron. Whereas many ways that violence does. The Five informants was aware that violence will always occur in every household, so they'll be more vigilant in determining the employer and concluded that attitude is a form of evaluation of the potential trend perasaan dan untuk yang is reacting component analysis of the interaction of *cognitive, affective* and *conation* which react with each other in understanding, feel and behave toward an object. Because, a person is not born with attitudes and views, but those attitudes are formed during development.
