ABSTRAK

TOOL DEVELOPMENT FOR THE QUR’AN CLAUSE TYPING USING LATeX AND PERL

By:
Nuraini Tri Wahyuni

The Qur’an clause typing process using the latex is very different from the usual document formatting, because it requires packages that must be attached to the latex system itself and requires accuracy in typing because it must comply with the standard of writing that has been determined. No exception for arab text typing or the Qur’an clause typing, it also difficult user and astemust time to typing and matching to the typing standart that had been made. This research offers a solution to latex users who want to write the Quran clause easier, more effective and more efficient. In this research TextMaker used as latex editor to process the discourse, and uses the library texlive, texlive arabic lang for writing the Quran clause. The final result is a tool for searching the Qur’an clause and also makeit easy to use in latex.

Keyword : LaTeX, Perl, Al Qur’an.
