ABSTRACT

COMMUNICATION PATTERN OF THE COUPLE ARAB AND NON ARABIC CULTURE IN THE FAMILY
(Study On Couples Arab-Non Arabic In Bandar Lampung)

By

Malani

From the research, the raised of the problem in these multicultural marriages by the difference levels of education and experience from each couple cause different way in solving the problems that arise. But the culture of each personal remains one of support in solving the existing problems. A variety of factors that supporting each partner in solving the problem turned out to be less than the impact of cultural factors of each couples.

Due to cultural factors that have the greatest role in this study with a variety of differences in upbringing and cultural differences and also the experience of each couple tend to be more dominant to Arab culture. So that the communication pattern made by both husband and wife of these different cultures refer to the upside communication pattern that refer to A. DeVito, where their marriage can only survive at least will survive because both parties feel they have contributed to one another.
