

ABSTRACT

THE FACTORS THAT DEALS WITH PERCEPTION FAMILY SCAVENGERS ABOUT EDUCATION OF CHILDREN

By

Vinta Riasyahrani Safitri

In a family of scavengers, the main problem facing at the moment is low or less concerned for their children to education. This is reflected in the data level of education of children of scavengers in the village wells Stone that the percentage of children who do not attend school or drop out of school is still very high. This study aims to determine the factors related to the perception of scavenger families about children's education. The research sample totaled 81 families scavengers, sampling is done by using Simple Random Sampling technique. Data collection techniques in this research using questionnaires, interviews, observation, and secondary data collection, while data analysis is done by cross tabulation analysis through statistical data processing programs, namely SPSS. The results showed that there was a significant correlation between the number of children, education level scavengers, scavengers family income, children's education expenses, and support education in neighborhoods with scavenger perceptions about children's education

Keywords: Scavenger, children's education, number of children, income scavengers, the cost of education.
