DIAN ASVARI

Fisheries and marine sector is a strategic sector and plays an important role in supporting the national economy. This got the attention of the government sector, which directly involves the public, especially fishermen, Efforts to improve the well-being of coastal communities has been conducted by the Ministry of Maritime Affairs and Fisheries, namely through the Coastal Community Economic Empowerment Program (PEMP). This program has been running since 2001. One recipient of a revolving fund program in 2011 is PEMP KMM (Cooperative Mina Mandiri) in the village of Labuan Maringgai Sri Minosari District East Lampung regency.

The problem in this study is whether the government program (PEMP) can increase the income of rural fishing communities in Sri Minosari. The research was conducted in the village of Sri Minosari, namely on the PEMP Program grantees. To prove the existence of an increase in income in the community after receiving funding PEMP program used nonparametric statistical test Wilcoxon Signed Rating (s Wilcoxon Signed Rank test).

Based on the survey results were received revolving fund, it is known that the average gross income before the program is Rp. 1.045.732, - / month, and the average gross income after fund management program is Rp 1.183.537, - / month. Thus there is an increase in the average income of Rp. 137.804, - (13%) after the aid program.

Based on the calculation of the value of Z is known to -6.69 which is in the region of rejection H_0 , so that H_1 is accepted. Thus, the hypothesis has been established that there is an increase in the income of the fishermen village of Sand Berm after rolling grant program PEMP proven.

Coastal Community Economic Empowerment Program (PEMP) has increased incomes of fishing communities in Desa Sri Minosari, the program should continue to be given to fishing communities in other areas so slowly coastal communities can prosper.

Keywords: Revolving fund, income of fishermen
