

## **ABSTRACT**

### **Implementation Of Government Policy In Dealing With Aftermath Of Flood Damage In Kabupaten Tanggamus**

by

**DIRWAN**

Issue in this study is handling of disaster damage especially floods has yet to resolve issue, where as the purpose of this study is : a) Want to know process of the implementation of government policies in tackling damage after floods carried. b) Want to know what are barriers that lead to implementation of government policy less than maximum.

Research methods used in this study is a qualitative method. The reason is to know directly implementation of government policies in addressing post disaster damage was done, and problems that will find a way out can be identified and approached in accordance with substance.

The results of this study indicate that, implementation of Government policy in tackling aftermath of floods in Tanggamus categorized as a form of implementation has not been successful. Policy implementation process in tackling post flood damage now found a number of barriers that are less direction a planning, in adequate budget, it's operational less seriously, less precise target.
