## DAFTAR GAMBAR

## DAFTAR LAMPIRAN

### BAB I. PENDAHULUAN
1.1 Latar Belakang Masalah ................................................................. 1
1.2 Identifikasi Masalah ........................................................................ 6
1.3 Rumusan Masalah ............................................................................ 7
1.4 Tujuan Pengembangan ..................................................................... 8
1.5 Manfaat Pengembangan ................................................................. 9
1.6 Spesifikasi Produk yang Diharapkan.............................................. 10

### BAB II. KAJIAN PUSTAKA
2.1 Teori Belajar .................................................................................. 11
2.2 Teori Pembelajaran ......................................................................... 18
2.3 Teori Komunikasi dalam Pembelajaran .......................................... 21
2.4 Teori Desain Sistem Pembelajaran ................................................ 22
2.5 Bahan Ajar ..................................................................................... 33
2.6 Pembelajaran Berbasis Multimedia ............................................... 35
2.7 Karakteristik Mata Diklat Menggambar Dengan Perangkat Lunak ... 45
2.8 AutoCAD ..................................................................................... 46
2.9 Hasil Pembelajaran .......................................................................... 48
2.9.1 Efektifitas Pembelajaran .......................................................... 48
2.9.2 Efisiensi Pembelajaran .................................................. 49
2.9.3 Daya Tarik Pembelajaran .................................................. 51
2.10 Lectora ............................................................................. 52
2.11 Penelitian Yang Relevan .................................................... 54
2.12 Kerangka Pikir ................................................................. 57
2.13 Hipotesis Penelitian .......................................................... 58

BAB III. METODE PENELITIAN
3.1 Desain Pengembangan ....................................................... 59
3.2 Tempat dan Waktu Pengembangan ...................................... 61
3.3 Langkah-langkah Pengembangan ....................................... 61
  3.3.1 Analisis Kebutuhan ....................................................... 63
  3.3.2 Perencanaan Pembelajaran ........................................... 63
  3.3.3 Desain Produk Awal ..................................................... 66
    3.3.3.1 Analisis Bentuk Media .......................................... 67
    3.3.3.2 Membuat Garis Besar Isi Program Media (GBIPM) ... 67
    3.3.3.3 Membuat Flowchart ........................................... 67
    3.3.3.4 Membuat Story Board ......................................... 68
    3.3.3.5 Mengumpulkan Bahan ......................................... 69
    3.3.3.6 Pembuatan Program ............................................ 71
  3.3.4 Uji Coba Produk Tahap I ............................................... 72
  3.3.5 Revisi Produk Operasional ........................................... 73
  3.3.6 Uji Coba Produk Tahap II ............................................... 74
  3.3.7 Produk ................................................................. 74
  3.4 Subjek Uji Coba Pengembangan ...................................... 74
  3.5 Teknik Pengumpulan Data ............................................... 77
  3.6 Definisi Konseptual dan Operasional .................................. 77
  3.7 Kisi-kisi dan Instrumen Penelitian .................................... 79
  3.8 Teknik Analisis Data ........................................................ 81
    3.8.1 Uji Ahli .............................................................. 81
    3.8.2 Uji Coba Terbatas ................................................... 81
    3.8.3 Uji Efektifitas ....................................................... 82
3.8.4 Uji Efisiensi .................................................................................................................. 87
3.8.5 Uji Daya Tarik ............................................................................................................... 88

BAB IV. HASIL PENELITIAN DAN PEMBAHASAN

4.1. Hasil Penelitian .............................................................................................................. 91

4.1.1. Deskripsi Pemanfaatan Bahan Ajar yang Digunakan Saat Ini dan Potensi
         Sekolah terhadap Produk yang Dikembangkan ................................................. 91

4.1.2. Proses Pengembangan Bahan Ajar Multimedia Interaktif Standar
         Kompetensi Menggambar dengan Perangkat Lunak (Software) .................. 94
         A. Me-review Produk yang Telah Ada ............................................................... 94
         B. Analisis Bentuk Media ................................................................................. 96
         C. Membuat Garis Besar Isi Program Media (GBIPM) ................................. 97
         D. Pengembangan Flowchart ....................................................................... 98
         E. Pengembangan Storyboard ....................................................................... 99
         F. Mengumpulkan Bahan .............................................................................. 100
         G. Pemograman ............................................................................................. 102

4.1.3. Uji Coba Ahli dan Uji Coba Terbatas ................................................................. 112
         A. Uji Coba Ahli .............................................................................................. 112
         B. Uji Coba Satu Lawan Satu dan Uji Coba Kelompok Kecil ..................... 115

4.1.4. Efektifitas Pembelajaran ....................................................................................... 116
         A. Uji Normalitas ............................................................................................. 117
         B. Uji Beda Data .............................................................................................. 118
         C. Uji Efektifitas Kognitif ............................................................................ 119
         D. Uji Efektifitas Psikomotor ........................................................................ 122

4.1.5. Efisiensi Pembelajaran ......................................................................................... 125

4.1.6. Daya Tarik pembelajaran ................................................................................... 126

4.2. Pembahasan ................................................................................................................. 128

4.2.1. Fungsi Produk ................................................................................................. 128

4.2.2. Efektifitas Multimedia Interaktif .................................................................... 129

4.2.3. Efisiensi Multimedia Interaktif .................................................................... 131

4.2.4. Kemenarikan Multimedia Interaktif ............................................................... 133
BAB V. SIMPULAN, IMPLIKASI DAN SARAN

5.1. Simpulan .................................................................................................................. 139
5.2. Implikasi .................................................................................................................. 141
5.3. Saran ....................................................................................................................... 142
