Problem in this research is the lack of ips learning outcome in grade V Elementary School Berundung South Lampung. This research aims to was the influence of usage cooperative learning model talking stick type toward IPS learning outcomes. This research was eksperimental research with nonequivalent control group desain which was quasi eksperimental research method. The sampling technique used purposive sampling with total sampels were 26 students. The data collection technique used test. The data analysis technique used polled varians t test. The results of data analysis was $t_{count} > t_{table}$, that H_0 rejected and H_a accepted which means there an influence of usage cooperative learning model of talking stick type towards IPS in grade V students of Elementary School Berundung South Lampung.

Keywords: IPS learning outcome, cooperative learning model, talking stick.
