Internet technology advances very fast and easy way to use it, allowing anyone to use the internet. One of the negative impacts of Internet technology advances for teens is giving a lot of information that contain elements of pornography. Existing in Indonesia Law Number 44 Year 2008 on Pornography and Presidential Regulation Number 25 of 2012 on the Prevention and Control Task Force Pornography. But despite existing laws pornography, dissemination pornografi among teenagers through online media in the city of Bandar Lampung many more.

This study aims to describe and analyze the problems of handling the spread of pornography through online media among teenagers in the city of Bandar Lampung. This study focused on: (1) Why pornografi easily spread among teenagers?, (2) What action do city Bandar Lampung government and stakeholders in addressing the spread of pornography?, (3) Constraints faced in tackling the spread of pornography?

This study shows there is no seriousness of the government in the city of Bandar Lampung overcome pornography deployment. It can be seen from the lack of concrete actions undertaken city Bandar Lampung administration for prevention ranging from the absence of local regulations on prevention pornography and absence control programs pornography.

Through results and discussion that has been described researchers suggested that city Bandar Lampung government began a program to combat the spread of pornography which has become a serious problem in the city of Bandar Lampung, one of them by forming a team of anti-pornography.
