

ABSTRACT

ANALYSIS OF BIOGAS PROGRAM IMPLEMENTATION IN DEVELOPMENT OF COMMUNITY PERSPECTIVE (Study Case in Pesawaran Indah Village, Subregency Padang Cermin, Pesawaran Regency, Province of Lampung)

BY

EKO MARISTIYAWAN

Empowerment is a key to self community development. Community is a key actors in empowerment perspective and have to aware and to understand important of public initiative to fulfill its necessities. Although community empowerment needed an assist from external actor, however it can be an autonomous subject for an empowerment program.

Biogas program was initiated by LPM Unila and has supported by Ministry of ESDM. The problem is only reactor from LPM Unila along with founding concept. Unfortunately, the reactor from Ministry of ESDM was not attached by a real program. By means of biogas program community has directed to consciously and sustainably develop the program in order that the benefits can be continued and continuously.

Focus of this research is analysis how to biogas program implementation from community development perspective. This study found that the community has still depending on University of Lampung. Community has concentrated to cow fertilizer than development of biogas program continuously. Biogas program has not successful yet to build empowerment construction for community autonomous because of three reasons. Firstly, lack of skills and innovation distribution. Secondly, there is no enough time for community empowerment program. Thirdly, there is no supported from local government.

Keywords: empowerment, biogas, development of community.
