This research aims to obtain a description and analyzed the evaluation of implementation community forestry policy in Sumber Jaya Subdistrict in West Lampung Regency 2013. The terms are aspects of policy standards and objectives, communication between the organization and activity measurement, organizational characteristics, conditions of social, economic, and political, resources, implementing and attitudes, as well as enabling and constraining factors. This study used a qualitative research approach that describes the type of descriptive facts that occur in the field related to the study. The method of collecting data is through documentation, observation, and interviews. The data analysis using data reduction, data presentation, drawing conclusions, and to achieve the validity of the data is done by triangulation of data.

Based on the research results that the evaluation of implementation community forestry policy in the West Lampung Regency spelled in Sumber Jaya Subdistrict is not being successful. This is because there is still a problem in the implementation of which is still found problems community forest area boundaries and the low of the holder of the Community Forest Management (IUPHKm) handed the General Plan and Community Forest Operational Plan.

The suggestions of writers for the evaluation of implementation community forestry policy in the West Lampung Regency on Sumber Jaya Subdistrict is as follows: (1) Forest Service needs to provide training in the work plan and report utilization of community forestry activities. (2) Forest Service must conduct forestry extension recruitment to accompany each group of community forestry. (3) the Government should also give attention to the budget provision. Government should be budgeted funds from the budget for the implementation of community forestry policy, so there is no shortage of budget, so that the implementation process can run smoothly and optimally.
