## I. PENDAHULUAN

1.1 Latar Belakang dan Masalah ........................................................................ 1
1.2 Tujuan Penelitian ......................................................................................... 3
1.3 Kerangka Penelitian .................................................................................... 3
1.4 Hipotesis ...................................................................................................... 10

## II. TINJAUAN PUSTAKA

2.1 Sistem Olah Tanah .................................................................................... 11
2.2 Alang-Alang (*Imperata cylindrica* L.) .................................................... 14
2.3 Cacing Tanah ............................................................................................. 15
2.4 Pengaruh Lingkungan Terhadap Cacing Tanah ........................................ 18
   2.4.1 *Bahan Organik Tanah* ...................................................................... 18
   2.4.2 *pH Tanah* ......................................................................................... 18
   2.4.3 *Kelembaban Tanah* ......................................................................... 19
   2.4.4 *Suhu Tanah* ..................................................................................... 20
2.5 Identifikasi Cacing Tanah .......................................................................... 20
   2.5.1 *Klitelum* .......................................................................................... 21
   2.5.2 *Pola Susunan Setae* ....................................................................... 21
   2.5.3 *Tipe Prostomium* ............................................................................. 22

## III. BAHAN DAN METODE

3.1 Tempat dan Waktu Penelitian ................................................................ 24
3.2 Bahan dan Alat ......................................................................................... 24
3.3 Metode Penelitian .................................................................................... 25
3.4 Pelaksanaan Penelitian ........................................................................... 25
   3.4.1 *Sejarah Lahan Penelitian* ............................................................... 25
   3.4.2 *Tata Laksana Penelitian* ............................................................... 26
### IV. HASIL DAN PEMBAHASAN

4.1 Hasil Penelitian ................................................................. 30  
   4.1.1 Populasi Cacing Tanah .................................................. 30  
   4.1.2 Biomassa Cacing Tanah .................................................. 33  
   4.1.3 Identifikasi Cacing Tanah ............................................... 36  
   4.1.4 Hubungan Antara Populasi dan Biomassa Cacing Tanah  
       dengan pH, C-Organik, N-Total, Suhu, Kelembaban dan Ruang  
       Pori Total Tanah .............................................................. 38  
4.2 Pembahasan ................................................................. 38

### V. KESIMPULAN DAN SARAN

5.1 Kesimpulan ................................................................. 45  
5.2 Saran ................................................................. 45  

**PUSTAKA ACUAN** ................................................................. 47  
**LAMPIRAN** ................................................................. 52
