Attention on the problems faced and natural in on her husband and baby were in the living wife / mother working today melamahnya attention and affection in the family . Problems related to a working wife is weakening attention to children and husband .The research problem is how to respond husband and children who live in their mothers work outside the State , whether that be a factor happened to her mother works outside the State , and how the efforts to overcome the problem of existing problems within the nuclear family .Type research used in this study is qualitative . The main focus of this research is a descriptive study of the responsibilities of the husband and wife work at staying out of State to become migrant workers . Determination of the informants in this study using snowball sampling method , where the informant is the way dadi Villagers Sukarame districts totaling 3 .Research results and discussion , descriptive study of the husband's responsibility in working as maids wife lived , the majority of the informants said that the phenomenon is familiar and no longer taboo , even for those phenomena tersebut no problem while not harming others , will but there are some informants say the phenomenon is a very bad thing and ought to follow, so that these phenomena are no longer encountered and experienced in the life of the nuclear family . Because for them the love and attention it is very important for the development of a better generation .At the end of this paper that became his conclusion is that the husband's responsibility to be extra in a foster home when the wife works and does not become a problem in the baby , and there is also an issue while not harming others
