ABSTRACT

Analysis of Group Communication Model in Mastery the Technical Traditional Dance to Children
(A Case Study at Dance Studio Sasana Budaya Bandar Lampung)

By

FITRIA HANI APRINA

This research background is in dance, each dancer must be able to communicate with her group and reaches an understanding and masters the same techniques to achieve a goal. The purpose of this study is: To determine the group communication model in shaping the child’s mastery of the technique of dance movement, then to determine, describe, and explain model communication that occurs between teaching team and children in the group dance studio Sasana Budaya Bandar Lampung, and the last to analyze the effectiveness of group communication model towards mastery of children to understanding dance.

This research uses descriptive qualitative method. Informants in this study were taken by using purposive (intentional). This study also uses group achievement theory. Results showed that the group communication is role to support the understanding of the child in mastering dance. On the analysis of the results of the research has been explained that communication model in the study are : wheel pattern and star pattern. Both patterns are shown to be effective in helping children to exchange information with teachers or other children dancers and resulting understanding and mastery of dance technique.
