| 10. | OKTOBER PERIODE 1 s.d 31 PANJANG DATA 1024 | <p style="text-align: center;">periode astronomi</p> <p>The graph for October 1986 shows a spectral analysis with amplitude on the y-axis (0 to 25) and period spectrum on the x-axis (logarithmic scale from 1 to 1000). A solid line with diamond markers represents the 'spektrum' (spectrum), showing a prominent peak at a period of approximately 30. A dashed line with downward-pointing triangle markers represents the 'astronomi' (astronomy) period, with three vertical dashed lines at periods of approximately 7, 12, and 18. The legend indicates 'spektrum' and 'astronomi'.</p> |
| | PERIODE TANGGAL 1 s.d 15 PANJANG DATA 512 | <p style="text-align: center;">periode astronomi</p> <p>The graph for the first 15 days of October 1986 shows a similar spectral analysis. The amplitude is on the y-axis (0 to 25) and the period spectrum is on the x-axis (logarithmic scale from 1 to 1000). The 'spektrum' (solid line with diamonds) has a main peak around 20. The 'astronomi' (dashed line with triangles) has three vertical dashed lines at periods of approximately 7, 12, and 18. The legend indicates 'spektrum' and 'astronomi'.</p> |
| | PERIODE TANGGAL 16 s.d 31 PANJANG DATA 512 | <p style="text-align: center;">periode astronomi</p> <p>The graph for the last 16 days of October 1986 shows a spectral analysis. The amplitude is on the y-axis (0 to 25) and the period spectrum is on the x-axis (logarithmic scale from 1 to 1000). The 'spektrum' (solid line with diamonds) has a main peak around 20. The 'astronomi' (dashed line with triangles) has three vertical dashed lines at periods of approximately 7, 12, and 18. The legend indicates 'spektrum' and 'astronomi'.</p> |
