ABSTRACT

ADAPTATION OF MODIFIED MCGILL MODEL TO TEST THE IMPLEMENTATION SUCCESS OF EAST LAMPUNG GOVERNMENT FINANCIAL MANAGEMENT INFORMATION SYSTEM

By

FERDI FEBRIANSYAH

This study aim to analyze and explain the effect of Government Financial Management Information System (SIPKD) application on employee performance (individual impact) at East Lampung Government.

This study using primary data which is obtained directly from the original source. The object of research is all the end user in Department of Revenue, Financial Management and Public Asset (DP2KAD) at East Lampung Government. The sampling method of this study using purposive sampling which is sampling method is based on certain criteria. The sample in this study amounted to 62 respondents. This study using Partial Least Square (PLS) for data analysis, It's one of the alternative method of Structural Equation Modeling (SEM).

Based on the results of a study from 62 respondents who uses SIPKD application in this research, the results statistically provide evidence that almost the entire tested hypothesis proposed by researchers are supported. The only one tested hypothesis which isn’t supported in this research are fifth hypothesis, Information Quality has a positive influence on Intended Use.
