After the return of village government in West Sumatra there were many shifts in the administrative structure of the village level. The shift is changing the system of government many villages which also makes institutions in villages overlap in carrying out their respective duties. Nagari Taram since the enactment of government in West Sumatra there are dynamics and problems in implementation. The problems that occur are not separated from the performance Wali Nagari Nagari as head of government. The problems that occur because of weak oversight of the Consultative Body.

This study focused on monitoring the performance of the Consultative Body Wali Nagari. The purpose of this study was to describe the oversight conducted Consultative Body on the performance Wali Nagari. The method used in this research is descriptive method with qualitative approach. Informants in this study is the Consultative Body, Wali Nagari, Nagari Secretary, and Community

Leaders. Data collection techniques used were observation, interviews, and review written documents.

The results of the analysis of this study that the surveillance conducted by the Consultative Body ineffective. It is observed from the analysis of the theory according Salamoen and Nasri and it appears that the implementation of the theory is still not well that makes ineffective oversight Consultative Body. Supervision Consultative Body are still weak. It is also caused due to various internal and external constraints on the Consultative Body. Weak oversight of the Consultative Body makes Wali Nagari not get tight control in governing village. The lack of control that causes the gap to the occurrence of irregularities and problems in the village.

Keywords: Village Government, Supervision, Consultative Body.
