

ABSTRACT

ANALYSIS OF FACTORS AFFECTING THE PROVINCIAL ECONOMIC GROWTH LAMPUNG

By

ASTRI NURUL INSANI

The purpose of this research was to determine Influence of the Human Development Index, Domestic Investment (DI), and Labor to Economic Growth in Lampung Province. The data used are time series of annual data from the years 1996-2012. Hypothesis testing is performed by multiple linear regression approach, *Ordinary Least Squares* (OLS) and the assumption klasik. Hasil study showed that overall all the independent variables used in the model have a significant effect on economic growth in the province of Lampung. However, the partial result that the variable Human Development Index (HDI) with a regression coefficient of 4.050842 positive effect influence on economic growth in the province Lampung. Variable Domestic Investment (DI) with a regression coefficient of 0.009025 and has negative and significant effect on economic growth in Lampung Province. Variable labour coefficient positive significant 0.714642 has influence on economic growth in the province of Lampung.

Keywords: Economic Growth, Human Development Index, Domestic Investment, Labor.
