

ABSTRACT

PATTERN OF HOUSEHOLD EXPENDITURE OF THE RECIPIENT OF SOCIAL ASSISTANCE PROGRAM IN BANDAR LAMPUNG CITY

By

Ica Rizki Aneftasari

The research aims to know the household income, pattern of household expenditure and the determinant of household expenditure of the recipient of social assistance program in Bandar Lampung City. The study was conducted in Rajabasa Sub Districts and Bumiwaras Sub Districts of Bandar Lampung City. The total samples were 76 recipients of social assistance program, drawn from the population by simple random sampling method. The data were collected in June to August 2020 and analyzed by qualitative and quantitative analysis. The data were analyzed by ordinary least square. This research results showed that the average household income of the recipient of social assistance program in Bandar Lampung City were collected by husband income, wife income, side job, conditional cash transfer assistance and BPNT assistance. The food expenditure Rp13.731.487,00 per year (50,64 percent) was greater than non-food expenditure Rp13.368.059,00 per year (49,36 percent). The determinant of household expenditure of the recipient of social assistance program in Bandar Lampung City were income, the wife's education, and total family member.

Key words: expenditure, income, determinant, social assistance program, the recipient of social assistance program

ABSTRAK

POLA PENGELURAN PADA KELUARGA PENERIMA MANFAAT (KPM) PROGRAM KELUARGA HARAPAN (PKH) DI KOTA BANDAR LAMPUNG

Oleh

Ica Rizki Aneftasari

Penelitian ini bertujuan untuk mengetahui pendapatan rumah tangga, analisis pola pengeluaran, dan determinan pengeluaran KPM PKH di Kota Bandar Lampung. Penelitian dilakukan di Kecamatan Rajabasa dan Kecamatan Bumiwaras, Kota Bandar Lampung. Total sampel sebanyak 76 KPM PKH, dipilih dari populasi menggunakan metode acak sederhana. Data penelitian diambil pada bulan Juni hingga Agustus 2020 dan dianalisis menggunakan analisis kualitatif dan kuantitatif. Data dianalisis dengan menggunakan analisis statistik dan regresi berganda. Hasil penelitian ini menunjukkan bahwa rata-rata pendapatan rumah tangga KPM PKH di Kota bandar Lampung berasal dari pendapatan suami, pendapatan istri, pendapatan sampingan, bantuan PKH dan bantuan BPNT. Pengeluaran pangan sebesar Rp13.731.487,00 per tahun (50,64 persen) lebih besar daripada pengeluaran non pangan sebesar Rp13.368.059,00 per tahun (49,36 persen). Determinan pengeluaran rumah tangga KPM PKH di Kota Bandar Lampung adalah pendapatan, pendidikan istri dan jumlah anggota keluarga.
