

ABSTRACT

PERFORMANCE DEVELOPMENT PROGRAM IMPLEMENTATION OF MOVEMENT SIMULTANEOUSLY BUILDING VILLAGE / WARD (GSMK / K) YEAR 2013 (STUDY KEL . MENGGALA SOUTH KEC . MENGGALA KAB . TULANG BAWANG

By

Muhammad Roofi'i

Infrastructure development plays an important role as one of the driving wheels of economic growth and development . The existence of adequate infrastructure is indispensable as well as roads and bridges . For the local government development program rolling Tulang Bawang simultaneous movement to build the village/ward GSMK/K . performance implementation GSMK/K implemented by government agencies and community empowerment village/ ward as accountability target group is Menggala southern village community in describing the performance of the program in program delivery and utilization of community engagement program itself as a target group in the performance of the implementation of this program is in forward in the empowerment of the target group but in its implementation society lack awareness and in participation.

This study aims to describe and analyze the role of the implementor in the performance of the implementation of development programs in unison movement to build the village / sub GSMK/ K . in village Menggala south district Bones Onions and analyze the constraints faced by the implementor in carrying out its role . The method used in this research is descriptive method . The type of data that is in use is the primary data obtained through interviews with informants and secondary data based on the existing documentations . Data analysis technique in use is descriptive analysis qualitative.

Based on the results of the study showed that the implementor role both government agencies and community empowerment villages/village or villages in the implementation of the program implementor simultaneous movement to build the village/ward GSMK/K in their role implementor has sought refers to the Regents regulations Tulang Bawang NO 17 of 2013 on guidelines for implementation motion

programs simultaneously build village/ward GSMK/K well as the responsible implementation and implementers at the district or sub-district level .

However, in practice is not optimal either in delivery village infrastructure development programs and results through the program . This occurs because some constraints , among other things : the lack of coordination between the district and sub-district implementor inhibiting role in the implementor , and a lack of understanding of the target group of the program so that the involvement society as target groups were not involved in the program GSMK .
