

ABSTRACT

CONSTRUCTION A ROUGH V -COEXACT SEQUENCE IN ROUGH GROUP

By

Desfan Hafifulloh

The concept of exact sequences has been widely used in ring and module theory. The U -exact sequence and the V -coexact sequence are generalizations of the exact sequence. Beside it, rough set theory has been implemented in several algebraic structures such as groups, rings, modules and others. In this research, a rough V -coexact sequence will be constructed in the rough group and their characteristics. Furthermore, we will give the relationship between the V -coexact sequence in the group and the rough V -coexact sequence in the rough group.

Keywords: Exact sequence, V -coexact sequence, and rough group.

ABSTRAK

KONSTRUKSI BARISAN *V*-KOEKSAK *ROUGH* PADA GRUP *ROUGH*

Oleh

Desfan Hafifulloh

Konsep barisan eksak telah banyak digunakan secara luas dalam teori ring dan modul. Barisan *U*-eksak dan barisan *V*-koeksak merupakan perumuman dari barisan eksak. Selain itu, teori himpunan *rough* telah diimplementasikan pada beberapa struktur aljabar seperti grup, ring, modul dan lain-lain. Pada penelitian ini akan dikonstruksi barisan *V*-koeksak *rough* pada grup *rough* beserta sifat-sifatnya. Selain itu, akan diberikan kaitan antara barisan *V*-koeksak pada grup dan barisan *V*-koeksak *rough* pada grup *rough*.

Kata Kunci: Barisan Eksak, barisan *V*-koeksak, dan grup *rough*.
