

ABSTRAK

ANALISIS PRESPEKTIF *ETHICS OF CARE* DALAM IMPLEMENTASI PROGRAM *THREE END'S* DI PROVINSI LAMPUNG

Oleh :
WAHYU SETIABUDI

Provinsi Lampung merupakan salah satu provinsi yang masih mengalami persoalan tentang perempuan dan anak, hal tersebut terlihat dari adanya peningkatan kekerasan terhadap perempuan dan anak, masih terjadinya perdagangan manusia, terjadinya disparitas ekonomi antara perempuan dan laki-laki. Dinas Pemberdayaan perempuan dan perlindungan anak (DPPPA) berupaya menjalankan fungsinya sebagai Lembaga pemerintah dalam tata kelola pemerintahan dengan mengimplementasikan program unggulan dari Kementerian Pemberdayaan perempuan dan anak Republik Indonesia yaitu program *three end's*. Tujuan penelitian ini yaitu menganalisis dan mendeskripsikan implementasi prinsip etika kepedulian dalam implementasi program *Three End's* di Provinsi Lampung yang dilakukan oleh DPPPA.

Implementasi program *three end's* yang dilakukan DPPPA memiliki sasaran perempuan dan anak perlu dicermati dengan teori kritis yang berprespektif *feminist*, karena itu penelitian ini menggunakan teori *ethic of care*. Penelitian ini menggunakan tipe penelitian deskriptif dengan pendekatan kualitatif. Hasil penelitian ini menunjukkan bahwa :

Dinas PPPA Provinsi Lampung telah menjalankan fungsi pelayanan, pemberdayaan, serta pembangunan melalui implementasi program *three end's*. kualitas moral dalam setiap fase *ethic of care* dapat dikatakan kompatibel dalam upaya pencegahan dan penanganan kekerasan terhadap perempuan dan anak serta *human trafficking*, akan tetapi dalam upaya meningkatkan ekonomi perempuan dalam rangka mengurangi disparitas ekonomi antara perempuan dan laki-laki belum dapat dikatakan kompatibel dengan seluruh kualitas moral dalam setiap fase *ethic of care* karena anggaran yang kurang memadai menyebabkan hasil dari upaya yang dilakukan tidak maksimal, sehingga kualitas moral *competence* dalam fase *care giving* dan *responsiveness* dalam fase *care receiving* belum dapat dikatakan kompatibel

Kata Kunci : Etika Kepedulian, Implementasi *Three End's*, Provinsi Lampung

ABSTRACT

ETHIC OF CARE PRESPECTIVE ANALYSIS IN THE IMPLEMENTATION OF THE THREE END'S PROGRAM IN LAMPUNG PROVINCE

**By :
WAHYU SETIABUDI**

Lampung Province is one of the provinces that is still experiencing problems regarding women and children, this can be seen from the increase in violence against women and children, the occurrence of human trafficking, the occurrence of economic disparities between women and men. The Office of Women's Empowerment and Child Protection (DPPPA) seeks to carry out its function as a government institution in governance by implementing the flagship program of the Ministry of Women's and Children's Empowerment of the Republic of Indonesia, namely the three end's program. The purpose of this study is to analyze and describe the implementation of the ethical principle of caring in the implementation of the Three End's program in Lampung Province which was carried out by the DPPPA.

The implementation of the three end's program by DPPPA which targets women and children needs to be examined with a critical theory with a feminist perspective, therefore this research uses the ethical theory of care. This study uses a descriptive type of research with a qualitative approach. The results of this study indicate that:

The PPPA Office of Lampung Province has carried out the functions of service, empowerment, and development through the implementation of the three end's program. Moral quality in every phase of ethics of care can be said to be compatible in efforts to prevent and handle violence against women and children and human trafficking, but in an effort to improve the economy of women in order to reduce economic disparities between women and men, it cannot be said to be compatible with all quality. moral in every phase of ethics of care because of inadequate budget causes the results of the efforts made are not optimal, so that the quality of moral competence in the phase of care giving and responsiveness in the phase of care receiving cannot be said to be compatible.
